WHAT DOES AMENDMENT MEAN FOR FLORIDA AND YOUR FAMILY?

Annual environmental and health benefits of approximately 7 million homes or businesses going solar in Florida:

- **CO₂**
  - GHG EMISSIONS Reduced by 8.5 Million metric tons
- **SO₂**
  - SULFER DIOXIDE Reduced by 5,000 metric tons
- **NOₓ**
  - NITROGEN OXIDES Reduced by 5,150 metric tons
- **PM**
  - PARTICLE MATTER 2.5 Reduced by 600 metric tons
- **H₂O**
  - WATER CONSUMPTION Reduced by 3.8 billion gallons

WHAT WILL IT DO?

Amendment 4 would allow for a property tax exemption for people who install solar panels on their home or business. The value of the solar panels would be exempt from property taxes when assessing the value of the home or business, lowering the cost of solar and energy.

HOW TO VOTE 4 SOLAR?

- **Vote-by-mail**, register at: www.FloridaSolarVoter.com
- **or**
  - **Vote early**, mark your calendar for: August 20 - 27
  - **or**
  - **Head to the polls**: August 30

Amendment 4 is a grassroots supported, bi-partisan proposal, not to be confused with the utility-backed proposal on the November ballot. This is paid for by Floridians 4 Lower Energy Costs, a non-profit 501 (c)(4) organization.

Paid for by Floridians for Lower Energy Cost.
**Lower Property Tax Bills**
Amendment 4 simply means going solar won’t raise the property taxes on your home or business; whether you lease or purchase your solar panels. This new property tax exemption is fair and will benefit all Florida families and businesses.

**Lower Power Bills**
While every solar energy system is different, most solar customers - business and residential - can lock in long-term savings on their monthly power bills by eliminating fuel costs. Amendment 4 will help Florida families save on power bills by harnessing the power of the sun. The use of solar power will protect you from utility company rate hikes, like the one proposed this year to raise rates by 24% over the next four years.

**Energy Independence & Sustainability**
Amendment 4 will make solar power more affordable and pave the way for Floridians to become energy independent. Solar energy is safe and clean with zero emissions and water usage. By creating this new tax cut, the Sunshine State will have greater access to solar power, helping to ensure a bright future for Florida families and our environment.

**New High-Tech, High Paying Jobs**
One out of every 83 new jobs created in the United States last year was in the solar industry. Yet, our state hasn’t been able to grow this new and booming sector of the economy and currently gets less than 1% of our total energy from solar. Amendment 4 will allow the solar industry to grow in the Sunshine State, creating new local jobs that come with great pay checks and cannot be outsourced.
